

Kings M150

Kings Industrial SLM 3D Printers

All closed looped powder handling system high precision &high quality

Advantage

- High precision &high quality: Supports 20µm laser spot size.
 Precisely print out every structural details, Adopting a concentrated laser, the energy greatly enhances the density and strength of the printed part
- All closed looped powder handling system: The low oxygen content in the manufacturing environment ensures that the metal is not oxidized, and is compatible with powders of different specifications
- Dual-circulation wind site protection system: Dual-circulation wind site protection system to extend the lifespan of the optical components
- Fully pop-up piston system: Equipped with a fully pop-up piston system, it is more convenient and quicker to replace metal powders, and 100% eliminates cross powder contamination when replacing powders
